Posting Date: January 7, 2010

Project Coordinator, Green Shield Certified and IPM STAR Programs

Full-time project coordinator position available with an independent non-profit organization working to reduce pest and pesticide hazards in agriculture and communities through Integrated Pest Management (IPM).

Current projects include IPM evaluation and certification which we make available to schools, healthcare facilities, pest management professionals, and others. Successful candidate will perform a variety of tasks to coordinate and lead Green Shield Certified and IPM STAR, both third-party certification programs for pest control services, schools and facilities of all kinds.

This is an excellent opportunity to interact on a regular basis with progressive professionals in the pest management industry and with leading environmental organizations nationwide, including those working on green buildings and environmentally friendly landscape design and maintenance.

Duties include tracking financial information, creating marketing plans, preparing confidential reports for participating entities, preparing yearly reports, supervising a project assistant, developing plans to grow and expand both programs and providing professional communication with clients and prospects.

Flexible schedule, 30 to 36 hours per week, hourly compensation ranging from \$12 to 13 commensurate with skills and experience. Health insurance benefit. Located in near-west Madison, on bus routes.

The IPM Institute of North America, Inc. is a non-profit organization formed in 1998. The Institute's mission is to accelerate adoption of IPM in agriculture and communities through consumer education and development of IPM standards for self-evaluation and IPM certification. Institute funders have included US EPA, USDA and members and supporters.
